

FEATURES

- Multi-touch sliders for faster transitions
- Traditional turntable and mixer layout
- 4-deck support - controls up to four unique decks or tracks
- Traktor LE serial number included
- USB class-compliant - no driver required for Mac or PC computers
- Integrated powered USB hub connects up to four USB devices
- Small footprint that fits practically anywhere
- Less moving parts than traditional controllers
- Easy to carry and can be used hand-held
- SCS.3m layout emulates a 2 channel-mixer
- SCS.3d provides the kind of control associated with CD decks
- Stand-alone functionality for generic midi-control

In the SC System 3, Stanton's unique touch-sensitive control surfaces and Native Instruments' new Traktor LE DJ software come together to create a completely intuitive and reliable DJ control solution that allows you to plug and perform anywhere in the world within a matter of minutes.

The system includes two SCS.3d deck controllers and the SCS.3m mix controller, which magnetically join together to give you the familiar layout of a traditional DJ rig, but in a sleek, mobile format with easy to use, fully integrated software control abilities that far surpass any DJ gear you've used in the past. Even better, there are no moving parts to break or wear out, so the SC System 3 can be used night after night with minimal wear and tear.

The two SCS.3d controllers operate like two mini-decks allowing you to use traditional DJ style motions and gestures on a touch-pad style surface to control DJ software. And the SCS.3m is a unique controller with all the functions of a two channel DJ mixer, plus a host of new performance control features.
