Take Your Mix Into the Future!
Welcome to the latest innovation in digital DJ technology, FinalScratch® 2. This complete package lets you play digital music files from any analog turntable or CD player with ultra-natural feel and response—whether cueing, mixing or scratching. With quick setup, professional 24-bit/96kHz sound quality, and the power of Native Instruments Traktor FS 2 software, FinalScratch 2 is the ultimate way for DJs to play digital the analog way!
The All-New ScratchAmp™ 2

At the heart of FinalScratch 2 is the new ScratchAmp 2, a FireWire® audio interface that delivers maximum audio throughput with minimal latency.

Professional Sound

Plug in your turntables, CD players and microphone to industry-standard 24-bit/96kHz converters for studio-quality sound. And because the ScratchAmp 2 is passive, you can run audio through the amp without power.

Blazing FireWire Speed

The ScratchAmp 2 uses FireWire protocol to process multi-channel audio with minimal latency, allowing the software decks to respond as quickly as your hands. A FireWire Thru port lets you connect an iPod™ or external hard drive.

Solid Design with MIDI Built-In

Thanks to its MIDI In and Out ports, the ScratchAmp 2 is ready to connect with many of the vast MIDI controllers available for additional “hands-on” control. The small and rugged aluminum chassis is perfect for home use or on the road.

New Traktor FS Software & Compatibility with Traktor DJ Studio

Compatible with Mac or PC, Traktor FS 2 gives DJs a simple, yet powerful way to organize music and play it back using two virtual decks. Traktor FS 2 supports today’s most popular file formats—including MP3, WAV, AIF, AAC and WMA—and can even play tracks right off your computer’s CD-ROM drive or an external FireWire hard disk.

Best of all, FinalScratch 2 hardware is now compatible with the award-winning Traktor DJ Studio by Native Instruments. By upgrading to the full version of Traktor, users gain a host of powerful features like looping, independent control over pitch and tempo, plus onboard filter effects and the ability to non-destructively record and edit your mix.

**FinalScratch 2 Features:**

- **New** 24-bit/96kHz hardware with Mic input, MIDI and more
- **New** hardware compatible with NI Traktor DJ Studio software
- 2 virtual decks with zoomable waveforms
- Play audio files from time-coded vinyl or CD
- Fast search engine works with over 50,000 tracks
- High-quality Key Lock (Master Tempo)
- **New** improved timecode readout with absolute/relative modes
- **New** mic recording with instant playback from vinyl
- **New** input recording for capturing your live mix direct to disk
- **New** loop playback makes adding loop samples to the mix easy
- **New** calibration tools provide optimal timecode response and tracking
- **New** cue points for marking breaks or other important sections
- **New** intelligent play history with time stamp and printing
- **New** onscreen 1-minute markers for faster visual cueing
- Lead-in graphics for use with lead-in grooves on vinyl
- Helpful auto gain adjust and BPM detection
- Assignable commands using “hot keys” or MIDI control
- Compatible with Apple® iTunes™

**Package Includes:**

- ScratchAmp 2 FireWire audio interface with two sets of Phono/Line inputs (switchable), a Stereo Aux input, and a Mic input (switchable)
- Traktor FS 2 software from Native Instruments
- 3 FS Standard time-coded vinyl records
- 2 FS time-coded CDs
- Four RCA cables
- FireWire cable (6-pin to 6-pin)
- Power Supply

**System Requirements**

- Mac Minimum: Mac OS X 10.3.5 or higher, G4 500MHz, 256MB RAM
- Mac Recommended: Mac OS X 10.3.5 or higher, G4 1GHz, 512MB RAM
- PC Minimum: Windows XP, Pentium III/Athlon 1GHz, 256MB RAM
- PC Recommended: Windows XP, Pentium IV/Athlon XP 2GHz, 512MB RAM

All systems require an IEEE 1394 (FireWire) port.
