

Versatile Digital DJ System with custom skin of Virtual DJ, giving three chained FX per deck & fader FX.
Simple Setup Plug and Play, with minimal configuration required to get you going and playing at your gig.
Built for the road Metal chassis, metal pots nipped to the unit, balanced outputs and a long-life crossfader.

Compact, Versatile Digital DJ solution

DJC.4 is a controller made to meet the needs of today's modern laptop DJ. The high-resolution jog wheels and pitch faders provide tight control over even the finest performance tweaks, and the rugged steel chassis, long-lasting faders and chassis-nipped pots are made to handle years of use. From mobile DJ's who need a high quality compact solution to controllerists who require functionality like hot cues, samples and advanced FX control, the DJC.4 has your needs covered.

FOUR DECK CONTROL

The DJC.4 includes 4-deck control functionality for control over 4 software decks at once. The included browse control section is capable of loading tracks to any one of the 4 decks, and intuitively labeled shift layers allow for direct access to filter, key and other advanced control.

Custom Virtual DJ LE DJC.4 Edition

Included in the box is a special version of Virtual DJ LE 7, with features exclusive to the DJC.4. A custom skin matches the control surface one to one, and each deck includes 3 chained FX processors for more control than any other Virtual DJ controller. As well, the DJC.4 has an exclusive Fader FX mode that allows for natural performance-based control of FX with the channel faders at the touch of a button.

PROTECTIVE TRAVEL BAG

Available as an accessory, this messenger style bag is designed to hold the DJC.4 / SCS.4DJ hardware as well as headphones, power supply, hard drives and other accessories. It has rugged nylon padded panels, heavy-duty buckles, an ergo-grip handle, and a padded shoulder strap.
